## FACULTY ACTIVITIES (2020-present)

### FACULTY

Sarah Nusser is Professor Emerita of Statistics and formerly affiliated with the Center for Survey Statistics and Methodology (CSSM) at Iowa State University, and recently held the position of research professor at University of Virginia's Social and Decision Analytics Division of the Biocomplexity Institute. Nusser's current research focuses on improving the reusability and impact of publicly accessible research data, and she leads an NSF-funded study to develop a framework that describes factors and practices that promote reusability of research data. Nusser is also involved in a UVA project to envision a new approach to conducting the decennial census based on a Curated Data Enterprise as the foundation for transforming the decennial census and other Census Bureau surveys. In her capacity as senior fellow with the Association of American Universities (AAU), Nusser was also involved in the Accelerating Public Access to Research Data initiative of AAU-Association of Public and Land-grant Universities (APLU).
